

Walking around our cellar, in addition to our vineyards, you can discover our garden, olive trees and unique views"

# L' OR TO

Danilo's Garden  
(family Garden and trees)

Not just vineyards

## Not just vineyards

Our family is strongly rooted in traditions. We have kept the family garden, from which we get seasonal vegetables. It is important to consume zero km products as much as possible for our health and that of our land. We also have fruit trees in the vicinity of each vineyard, as per tradition.

la nostra salute è quella  
della Terra.  
La salute della Terra  
è la nostra

## Walking in our vineyards

### OUR GARDEN

At the end of the tasting, remember to ask us the Cannubi walk experience map. You will get to know more curiosities, and see with your own eyes, the vegetables in season and discover their names also in Piedmontese.

### THE OLIVE TREES

Along the way you will find some olive trees. Each plant bears the name of one of the members of the family. The sheltered and strategic position allows us to collect excellent olives for the family.

### FRUIT PLANTS

In the vicinity of our vineyards there are fruit trees. At one time it was usual to plant them at the beginning of the vineyard or even inside. The plants gave shade to those who worked them and a fruit as refreshment.

Vigna Gorat: table grape pergola  
Vigna Battista: fig and almond tree  
Vigna Nuova: Apricot plant
