Fratelli Serio & Battista Borgogno
Dal 1897, vigneti e cantina in Cannubi

Discover our story

Welcome to the heart of Cannubi:
Where for five generations
our family of winemakers has passed down
the passion for making wine.

Even today, the winery maintains an absolutely family-run character, where innovation embraces tradition and the different generations interact with common goals.
Our goal is to produce healthy, high-quality grapes while respecting and safeguarding biodiversity.
This makes our vineyards so unique.
For this reason, we use natural products wherever possible. We do not use herbicides and are attentive to sustainability and biodiversity.
We believe that our work in the cellar should be limited to preserving and preserving the characteristics of the different vineyards. The aging process does not follow pre-established criteria; the contents of each barrel are constantly tasted by every member of our family, ensuring that the wood does not overpower and alter the character of the wine and the vintage.
We still ferment our wines in large, conical wooden barrels called "tini" and use large Slavonian oak barrels,with capacities ranging from 25 to 50 hl,to preserve the traditions of our ancestors..

Cannubi Walk Experience

Cannubi is probably one of the most complex and fascinating Barolo MGAs.
The uniqueness of this vineyard lies in the union of the two main slopes of the Barolo area (Helvetian and Tortonian), composed primarily of fine sand, limestone, silt, and clay.
These, combined with the microclimatic conditions and exposure, give the wine fullness, elegance, finesse, and longevity.

To learn more, request a map of our
Cannubi Walk Experience,
to conclude your experience in our
winery and fully enjoy the surrounding landscape.
